BIOL 448C – Tropical Ecology & Conservation

3 credit course in Spring 2020

Instructor: Jill Jankowski

What are the factors that make tropical systems both unique and also vulnerable to degradation? Learn about the structure, function and biological history of the tropics, and the myriad challenges these regions face in biodiversity loss and conservation practice.

Level: Designed for 4th year students, open to 3rd year and grad students

Lectures: MW 12 - 12:50; Lab: Th 14:00 - 17:00
